

## International Automotive Components **FiberFrame**<sup>™</sup>

FiberFrame<sup>™</sup> is an environmentally sustainable and lightweight natural fiber sunroof frame. This proprietary innovation is made of 70 percent renewable, raw-material content, and provides up to 70 percent in weight savings compared to conventional metal-reinforced steel sunroof frames.

Category:  
**Module**

Application:  
**2016 Mercedes-Benz E-Class,  
2018 Mercedes-Benz A-Class**

Weight Savings:  
**1,300 g**  
Lighter than the previous model

Methodology:  
**Design Optimization**
